ABOUT US

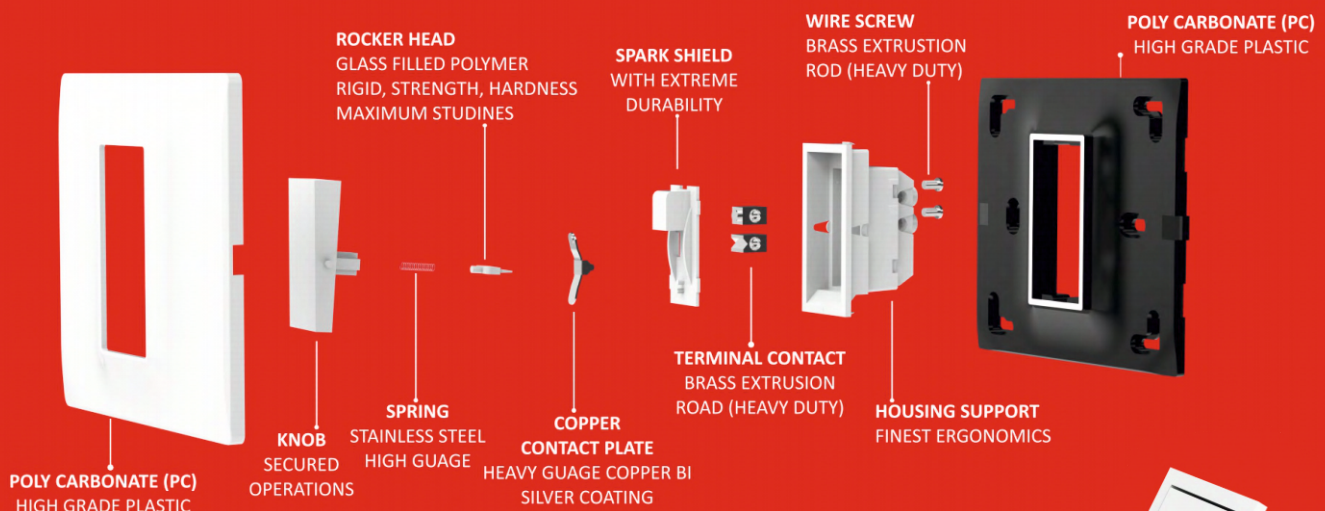

Zino electronics pvt ltd is an Indian quality standard, bis iso 9001:2015 certified company we have complete range of modular electrical accessories with elegant apprence, innovative designs and best quality under the brand name zino we look forward to provide safe easiliy operated and innovative products to our customers by cutting edge technology an highly qualified and dedicated team. Zino was established in since 2020 which located in ghaziabad (u.p) company is adhering to concept of meticulousity stability effieience and intiative erraction and we are customer oriented continusely improve quality to provide customer with high quality products and good after sales services and long term bussiness relationshipTechnology innovation optimum performance excellent quality intimate service on the time delivery and value creation are the quality management key of the company that strike maintain peak performance new creation improved solution.

Solution
FOR A *Green Planet*

Are you tried of dealing with multiple power outlets and struggling to find enough sockets for your heavy -duty electrical appliances? Say good bye to the hassle and welcome the electric heavy socket a revolutionary solution designed to provide reliable and convenient power to your high wattage devices with its robust construction and cutting edge technology the electric heavy socket is ready to the power the future

Are you searching for a reliable and sturdy solution to control the electrical flow to your heavy -duty equipment? Look no further introducing electric heavy switches the ultimate choice for managing high wattage devices with ease and confidence engineered to handle the demands of industrial settings workshops and commercial spaces these switches are built to empower your electrical control Like never before

Enhanced Safety Measures

Safety is paramount when dealing with high-power electrical systems. Electric Heavy Switches incorporate advanced safety features, such as thermal overload protection, arc suppression, and short-circuit prevention mechanisms. These safety measures provide peace of mind, safeguarding both your equipment and personnel from potential hazards.

Note : RCB/RCW Modle stands for Rocker Switch Balck & White

Excellent Performance

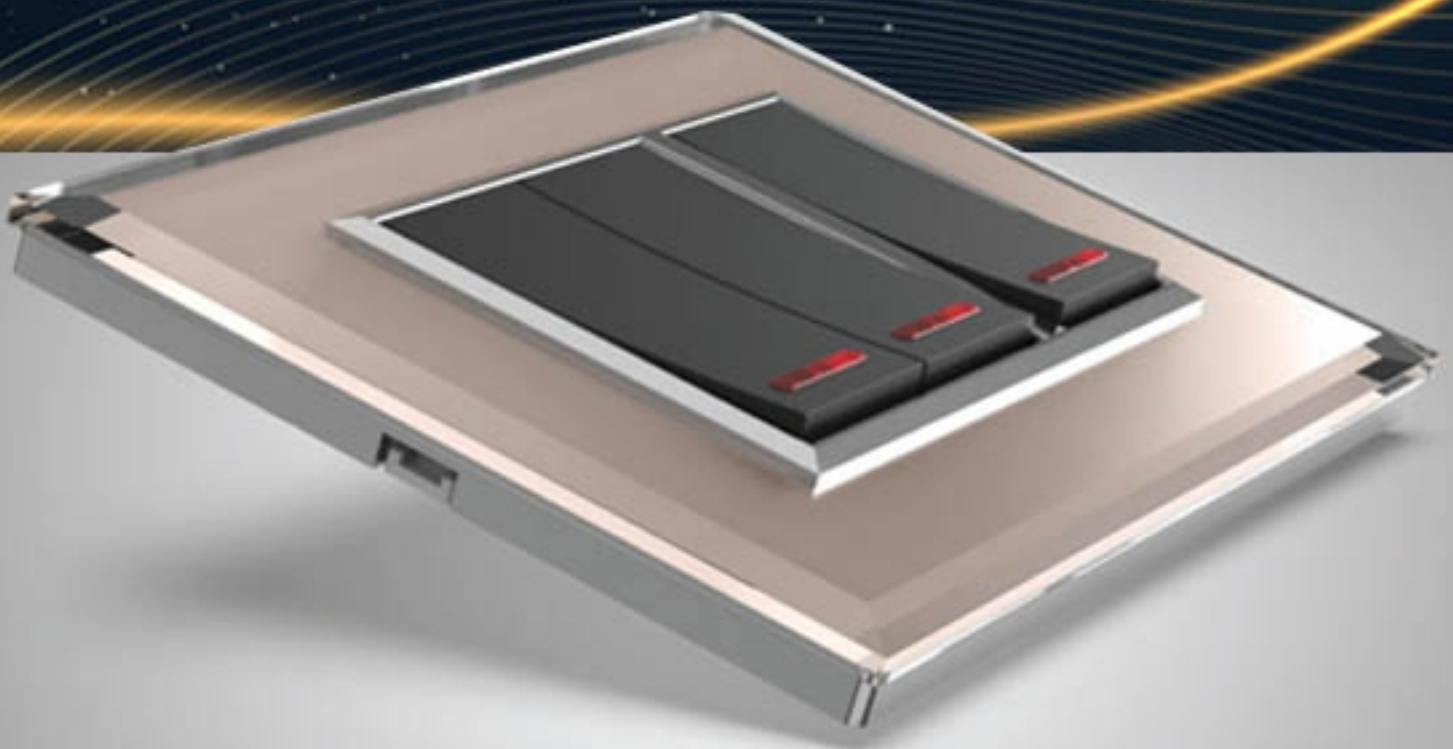

The Zino miniature circuit breaker (MCB). It automatically switches off the electrical circuit during an abnormal condition of the network and protective device fitted in the fuse box that will disconnect a circuit if there is a fault or overloaded. The fan regulator is easy to grip and is much more comfortable to operate than regular circular ones. A socket is known as receptacle or outlet is fixed In place often on the interval walls of the building and is connected to an AC electrical circuit inserting "plugging in" The plug into the socket allows the device to draw the power from this circuit.
